

bproauto® semi-synthetic ATF fluid

For transmissions thirsting for smooth operation

bproauto® ATF is a premium quality, part-synthetic transmission fluid designed for automatic transmissions in most passenger cars and light trucks. Its carefully balanced friction properties **ensure smooth shifting** and **excellent anti-shudder performance**. It has high shear stability and **excellent oxidation resistance for long service life**.

Smooth-shifting wear protection

Applications

- Chrysler automatic transmissions, except continuously variable transmissions (CVTs)
- Ford automatic transmissions where MERCON® V or an earlier-generation MERCON fluid (obsolete) is specified
- GM automatic transmissions in 2005 and earlier vehicles, except those that require DEXRON®-VI for warranty coverage, or a CVT fluid
- Many import vehicles, including Acura, Audi, BMW, Honda, Hyundai, INFINITI, Kia, Mazda, Mercedes-Benz, Mitsubishi, Nissan, Porsche, Saab, Saturn, Toyota, Volkswagen and Volvo⁽¹⁾
- Heavy-duty automatic and powershift transmissions in trucks and buses
- Hydraulic systems on industrial and mobile equipment operating over a wide temperature range

bproauto ATF is OEM-approved for service fill in the following applications:

- Ford MERCON V (License Nos. M5091007, M5091008, M5091009)
- Voith DIWA transmissions

Meets or exceeds the following performance requirements:

- JASO M315
- Class 1A performance standard developed by Japanese automakers for service fill ATFs

bproauto ATF is recommended for service fill in the following applications:

- Allison automatic transmissions in off-highway applications where a C-4 quality fluid is specified
- ZF Ecomat transmissions

Partner with bproauto to provide your customers with maximum wear protection and a better driving experience.

(1) bproauto ATF is not recommended for use in continuously variable transmissions (CVTs) or in most 6-speed or 7-speed automatic transmissions. For questions about a specific application, please call our Technical Support Hotline.
